### Details of Stakeholders

1. **Government:** Role of government as the **policy maker** is crucial in context of conservation & prevention of the environment. Government's responsibility is to **codify laws** regarding pollution, convention and sustainable uses of natural resources. As the **funding agent** for law enforcement their role is immensely crucial.
2. **NGOs:** Environmental NGOs play a crucial role in helping to plug gaps by conducting research to facilitate **policy development**, **building institutional capacity**, and **facilitating independent dialogue** with civil society to help people live more sustainable lifestyles. NGOs, in collaboration with the government, play a major role in addressing some of the region's environmental issues. They also team up with the masses to understand their current situations.
3. **Academician:** Academic is a magnifying glass of the society .Social structure & development rest with the involvement of academicians. Their views regarding the environment are supported by proper **facts and figures** unlike commoners'. This group accommodates **researchers and intellectuals** of the society.
4. **Entrepreneurship:** In an increasingly environmentally conscious world, business owners have an **ethical and moral obligation** to protect the environment. Many businesses have taken the lead on this objective by promoting green practices and encouraging customers to do the same. Entrepreneurs bring out **policies** at a micro level after taking into consideration the policies of the government and the views of the people.
5. **Commoners:** The idea that individuals can't affect change is a myth. An individual's views are based upon simple **observations** and serve as the basis for decision making for all other groups. Their observations are supported simply by **experiences** and **not by facts and figures**.
