

— THE CONFERENCE —

DUSF '22 x H-MUNEA '23 is a three-day youth conference and the fusion of Harithkram's two flagship events: Delhi University Sustainability Forum (DUSF) and Harithkram Model United Nations Environment Assembly (H-MUNEA). This conference marks the fifth edition of DUSF and the sixth edition of H-MUNEA.

This year, Harithkram decided to take cue from the theme of India's G20 Presidency, i.e., *Vasudhaiva Kutumbakam*, emphasizing the interconnection between biodiversity and the role of youth in addressing climate change and sustainability. Hence, the focal theme of the conference is "Youth for 'One Earth, One Future:' Climate Change, Sustainability and Sustainable Practices."

Under the aegis of DUSF, we will organize the Young Scholars' Conference (YSC), School Students' Conference (SSC) and National Photography Competition (NPC) with the aim to steer the future of our planet towards environmental sustainability by adopting sustainable practices.

This edition of H-MUNEA will provide a unique platform for young scholars from diverse backgrounds to engage in intensive discussions, debates and brainstorming sessions with a focus on addressing pressing challenges related to climate change, sustainability and sustainable practices.

— THE COLLEGE —

Shaheed Bhagat Singh College, founded in 1967 as part of the University of Delhi, is a co-educational institution named in honor of the renowned Indian freedom fighter, Shaheed-e-Azam Sardar Bhagat Singh. With a focus on fostering independent thinking and vision, the college has gained recognition for its excellence in various academic and professional disciplines. It offers a vibrant and intellectually stimulating academic environment, supported by modern facilities that enhance knowledge, skills and capabilities.

— HARITHKRAM —

Harithkram, the Environment Society of Shaheed Bhagat Singh College was inaugurated by the eminent environmentalist and writer Padma Shri Sunita Narain on September 7, 2012. Its mission is to create environmental awareness and promote green and sustainable activities both within and beyond the boundaries of the College. It develops and channelizes the creative ideas of young and potential environmentalists towards a greener world through team building, environmental education and environmental advocacy.

CONCEPT NOTE 2023

Climate change is an immediate threat affecting ecosystems, societies and economies worldwide. The climate situation worldwide is critical, and it has become imperative that we embrace sustainability in all its aspects — environmental, social and economic — and incorporate sustainable practices in our lives to protect the planet and secure the well-being of future generations.

Young people possess significant power to drive change and are at the forefront of climate activism. Youth can offer refreshing perspectives and innovative solutions and hence become powerful catalysts for transformative change. Empowering young individuals to engage in sustainable practices has a ripple effect, inspiring broader societal change.

Sustainability and sustainable practices are at the core of building a resilient future, which goes hand in hand with social equity and intergenerational justice. The concept of 'One Earth, One Future' highlights the interconnectedness and equitable existence of all living beings on our planet. Through global solidarity and collaborative efforts, we can build a future where the well-being of the planet and the populace are harmoniously balanced.
